

Quality Policy

- We shall market developed products, which we design in the right quality according to official demands at competitive prices
- We shall deliver faultless products on time
- The company shall continuously improve the quality assurance system

Our continuous improvement of the management system is based on our quality and environmental policy, environmental aspects, goals, customer information, revision results, information analyses, corrective and preventive measures. This is dealt with at the Management's review.

In this way, our customers are guaranteed products and services delivered in accordance with specifications and contract. It is our ambition that all work in the company shall be done right from the beginning and delivered in time.

The Management has the overall responsibility for the maintenance of the quality policy and shall support all initiatives to achieve the quality goals set up and improve the quality assurance system.

Furthermore:

- provide the employees concerned with correct information, education and training regarding customer requirements and constitutional demands, enabling them to perform their assignments
- make sure that there is a good relationship between the company, the employees and those around them
- work for a well functioning co-operation with all sub-suppliers of the company in order to ensure quality levels and delivery times
- The quality policy is revised at the Management's review.
