

Purac DAFRapide®

NEW INNOVATIVE DESIGN

Super-compact high-rate separation of suspended solids

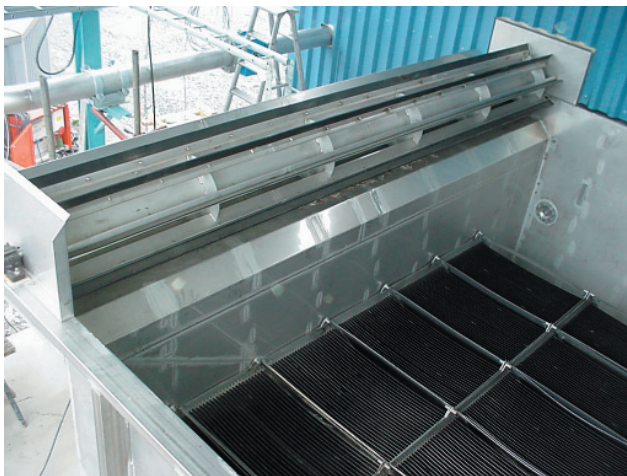

Features:

- Suitable for water and wastewater treatment
- Minimal space required
- Operates at high hydraulic loads, typically 30 - 50 m/h
- Short flocculation time, 5 - 10 minutes
- Guaranteed performance

Combines the advantages of dissolved air flotation and lamella settling in the same unit.

1 + 1 = 1
